

General Questions:

- 1. What is OneTap Coin?** OneTap Coin is a cryptocurrency focused on fair distribution and accessibility. It operates through a decentralized network, enabling users to participate in mining using only their mobile devices.
- 2. How does it work?** OneTap Coin operates on a reward-for-activity principle. After installing the application and accepting the terms of use, it is enough to simply enter the application twice a day and initiate the reward process by tapping a single button within the app.
- 3. Is OneTap Coin free to mine?** Yes, OneTap Coin is free to mine. All you need to do is install the application, accept the terms of use, and follow the simple steps within the app to begin the reward process. Your device will not incur additional costs apart from the standard energy and resource consumption during usage.
- 4. How can I start mining OneTap Coin?** To start mining OneTap Coin, follow these steps:
 - **Download the application:** Visit the official website or the appropriate app store (Google Play Store or Apple App Store) and download the OneTap Coin application.
 - **Install and register:** Once installed, open the app and create an account by entering the required information and accepting the terms of use.
 - **Start the reward process:** Follow the instructions within the application. Typically, you need to open the app twice a day and initiate the reward process with a single tap on a button.
- 5. On which devices can I mine OneTap Coin?** OneTap Coin can only be generated on mobile devices. This includes smartphones and other portable devices that support the application. It is designed to be simple and accessible for a wide range of users.
- 6. How many OneTap Coins can I earn daily?** The amount of OneTap Coins you can earn daily depends on several factors, including:
 - **Your activity:** Regularly opening the app and initiating the reward process.
 - **Current network difficulty:** As the network becomes more popular, it may become harder to earn larger amounts.
 - **Referrals and team contributions:** Additional earnings can come from the referral program, where you receive rewards for bringing in new users, as well as from the contributions of your team within the app.

Technical Questions

1. How do I install the OneTap Coin application?

- On your smartphone, open the Google Play app (for Android devices) or the App Store (for iOS devices).
- Searching for the Application: OneTap
- In the search field, type "OneTap Coin". Ensure that the app is developed by the official team to avoid downloading fake applications.
- Downloading and Installation:
- Once you find the app, tap the "Install" button (for Android) or the "Get" button (for iOS). The app will be automatically downloaded and installed on your device.
- Registration and Initial Steps:
- After the app is installed, open it and follow the simple registration steps. You can use the available options to create an account.
- Accessing App Features:
- Once registered, you can start using the app's features, including the "TAP TO MINE" function for mining.

2. Does the application consume battery or slow down the phone?

- Battery consumption is limited only to the time when you are actively using the application. We have implemented a security system that automatically logs users out every time they exit the application. Therefore, each time you launch the app, you need to log in again, ensuring security and reducing the strain on the device when the application is inactive.

3. Does OneTap Coin use blockchain technology?

- Currently, OneTap Coin does not use blockchain technology. However, it is planned to integrate blockchain before its launch on the mainnet. All users will be informed about this transition and its details in due course.

4. Does the application require internet for mining?

- The internet is only required to launch the application and activate mining by pressing the "TAP TO MINE" button. After that, for the next 12 hours, the internet is not necessary for the OneTap application's functionality. This allows users to save mobile data while the mining process continues autonomously.

Security and Privacy

12. Are my data safe in the application? Your data is protected through the implementation of advanced security measures. OneTap Coin uses encryption and other industry standards to ensure that personal and confidential data remain secure. Additionally, the application automatically logs users out upon exit, further safeguarding data privacy and security.

13. Does OneTap Coin request personal data? OneTap Coin collects only the minimum necessary data required to create an account and ensure the functionality of the application. Personal data, such as email or username, is used exclusively for communication and verification purposes, in accordance with the app's privacy policy.

14. How can I protect my account? To maximize the security of your account:

- Use a unique and strong password.
- Do not share your login details with others.
- Regularly update the application to receive the latest security improvements.
- Enable additional security options (such as two-factor authentication, if available).

15. What if I lose access to the application? If you lose access to the application:

- Try resetting your password via the "Forgot Password" option.
- If you still cannot access it, contact the support team through the help options in the app or the official OneTap Coin email.
- When contacting support, provide relevant information to verify your identity so your account can be recovered as quickly as possible.

Earnings and Value

- 16. When will OneTap Coin have market value?** Currently, OneTap Coin does not have a market value, but it will obtain one before launching on the mainnet. Users will be promptly informed of all details related to this process.
- 17. Can I sell or exchange OneTap Coin for real money?** At the moment, OneTap Coin is not available for sale or exchange for real money. This functionality will be enabled once the coin gains market value and is integrated into relevant platforms.
- 18. Will OneTap Coin be listed on exchanges?** It is planned for OneTap Coin to be listed on exchanges after the transition to the mainnet is complete. Details about the listing will be announced to users through official channels.
- 19. Are there additional bonuses for active users?** Yes, active users can earn additional bonuses through the referral program and regular mining. These bonuses include extra tokens for inviting new users and rewards for consistent activity.
- 20. How can I increase my earnings?**
- Regularly activate mining by pressing the "TAP TO MINE" button.
 - Use the referral program to invite new users and earn bonuses.
 - Monitor notifications in the app for special promotions and additional rewards.
 - Stay active and check the app frequently to make the most of all available options.

Community and Support

- 21. How can I invite friends, and do I get rewards for it?** You can invite friends using your unique referral code displayed in your user interface. When invited users create an account and start using the app, you receive bonuses in the form of additional tokens. This option allows you to increase your earnings and contribute to the growth of the community.
- 22. Is there an official community or forum for OneTap Coin?** Yes, there is an official community for OneTap Coin users. We recommend joining forums or groups on platforms such as Telegram, Discord, or other networks listed in the app or on the official project website. There, you can share experiences, ask questions, and follow discussions.
- 23. How can I contact support if I have an issue?** You can contact the support team through the Help section within the app. Alternatively, you can send an inquiry to the official OneTap Coin team email address or use the contact forms available on the official project website.
- 24. Where can I follow updates about the project?** You can stay informed about the latest project updates through:
- The central notification section within the app.
 - Official OneTap Coin social media pages and channels (e.g., Discord, X, Telegram).
 - The official project website and blog.
- 25. How can I contribute to the development of OneTap Coin?** If you'd like to contribute to the development, you can:
- Actively participate in the community by sharing feedback and suggestions.
 - Report bugs, errors, and issues in app functionality.
 - Promote the app and project through the referral program on social media and among friends.
 - Participate in beta testing or development activities if the project offers such opportunities.
 - Contact the team with your suggestions or skills that could help the project's development.
